Primary (9-10 years old)

## Biodiversity loss

what are the causes, the consequences and the possible actions to avoid this problem?

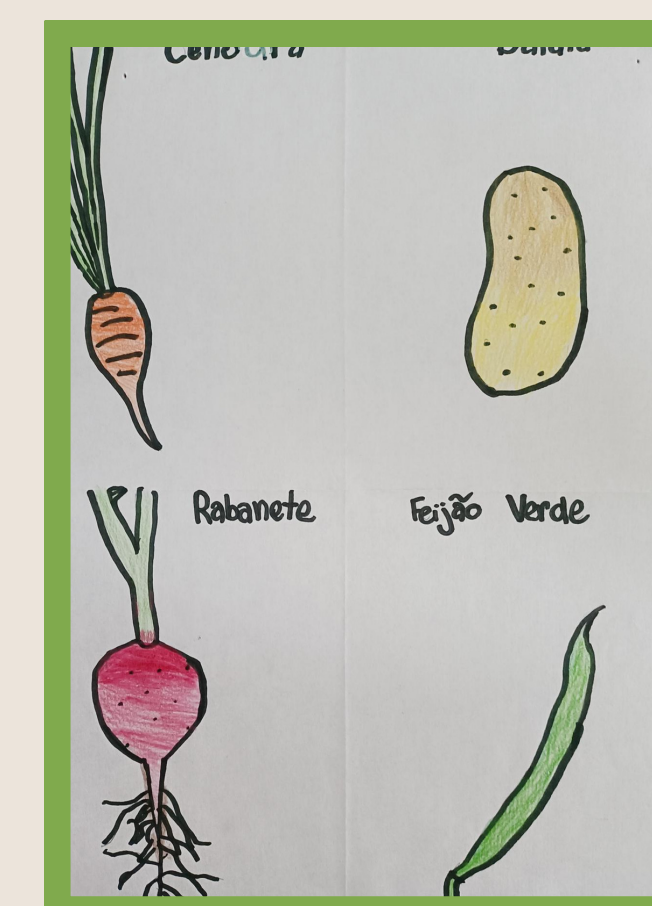

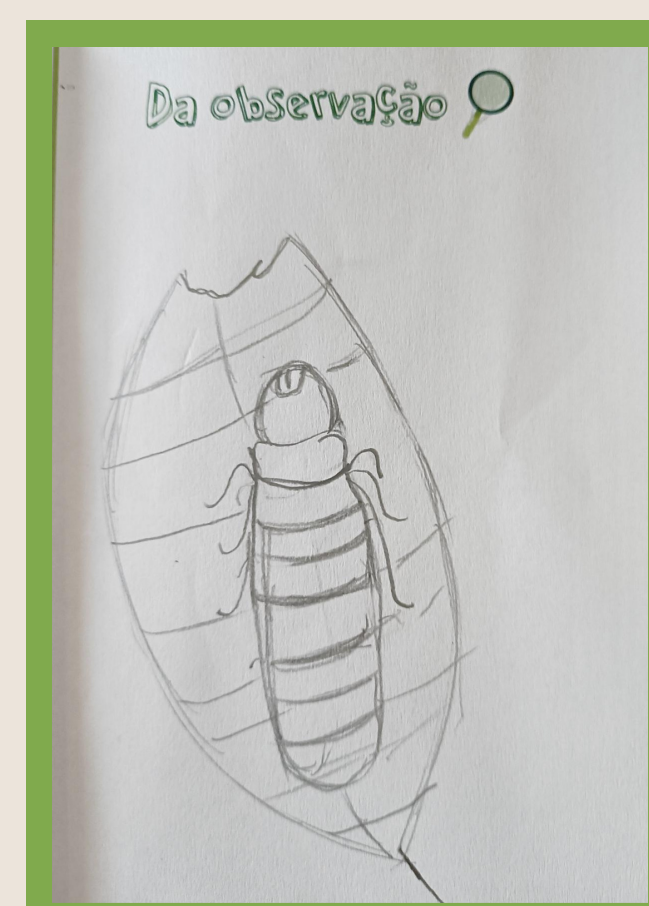

Marta Serôdio- Primary teacher • Rui Pereira- Visual Education teacher • Library • "Science Club" • Ciência Viva- societal partner

### School vegetable garden

#### Detect living beings

#### Different plants and animals drawing

ASK

Are insects harmful or beneficial for the garden?

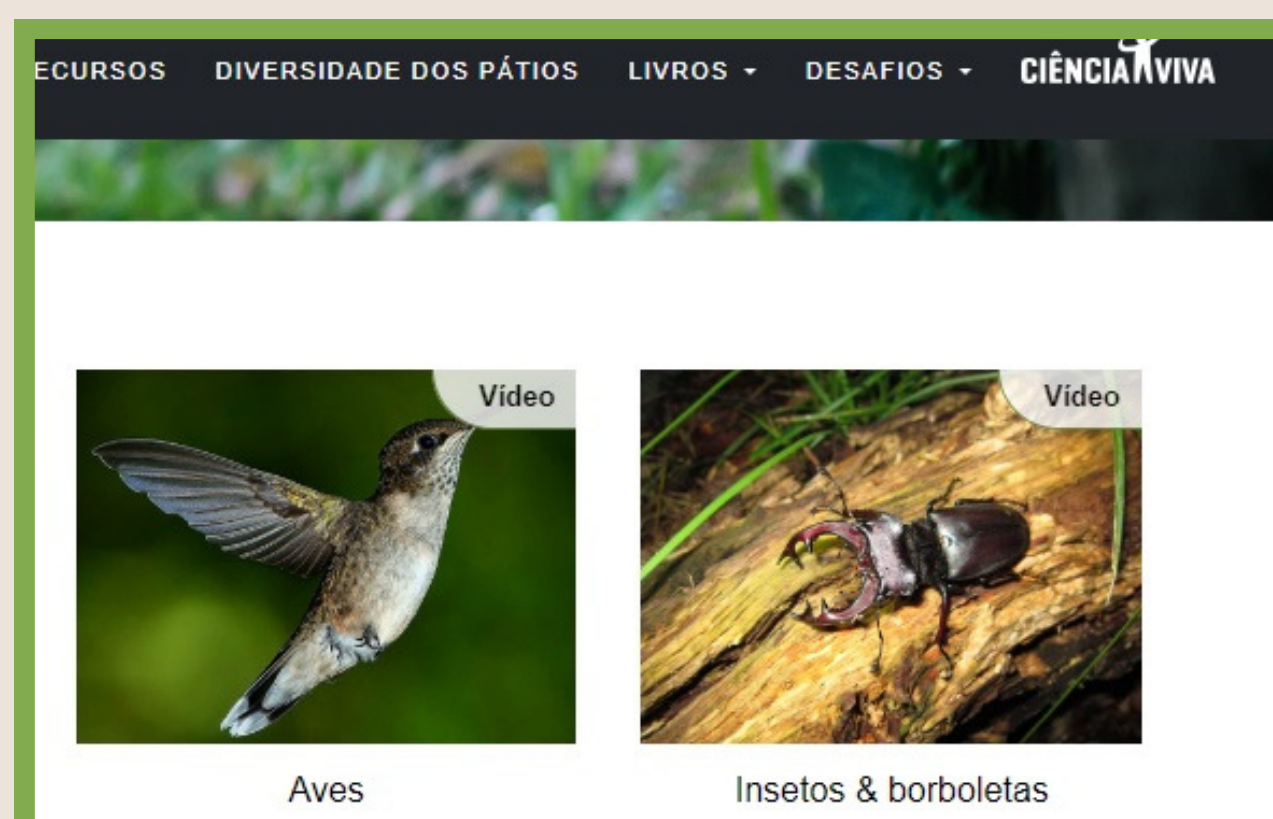

FIND  
OUT

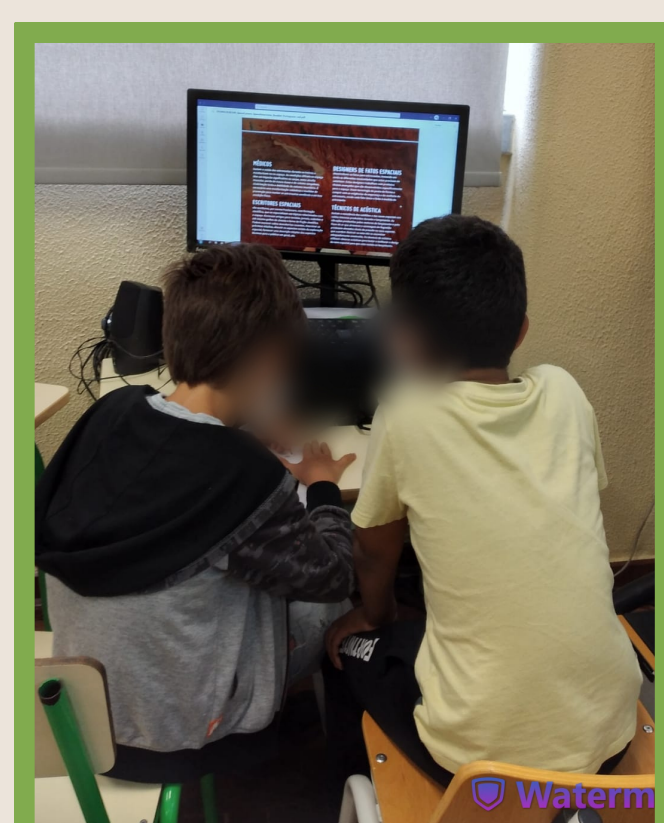

#### Research books, videos and internet

At the library

With the family

In the classroom

#### Discussion the specific roles of insects in the ecosystems

I believe that all animals have a job in the garden, even if they seem like they are going to spoil it, they have a contribution to its balance.

Beatriz

I discovered an amazing thing, the bee is not the only insect that contributes to pollination, the ant too.

Carolina

This work was extremely

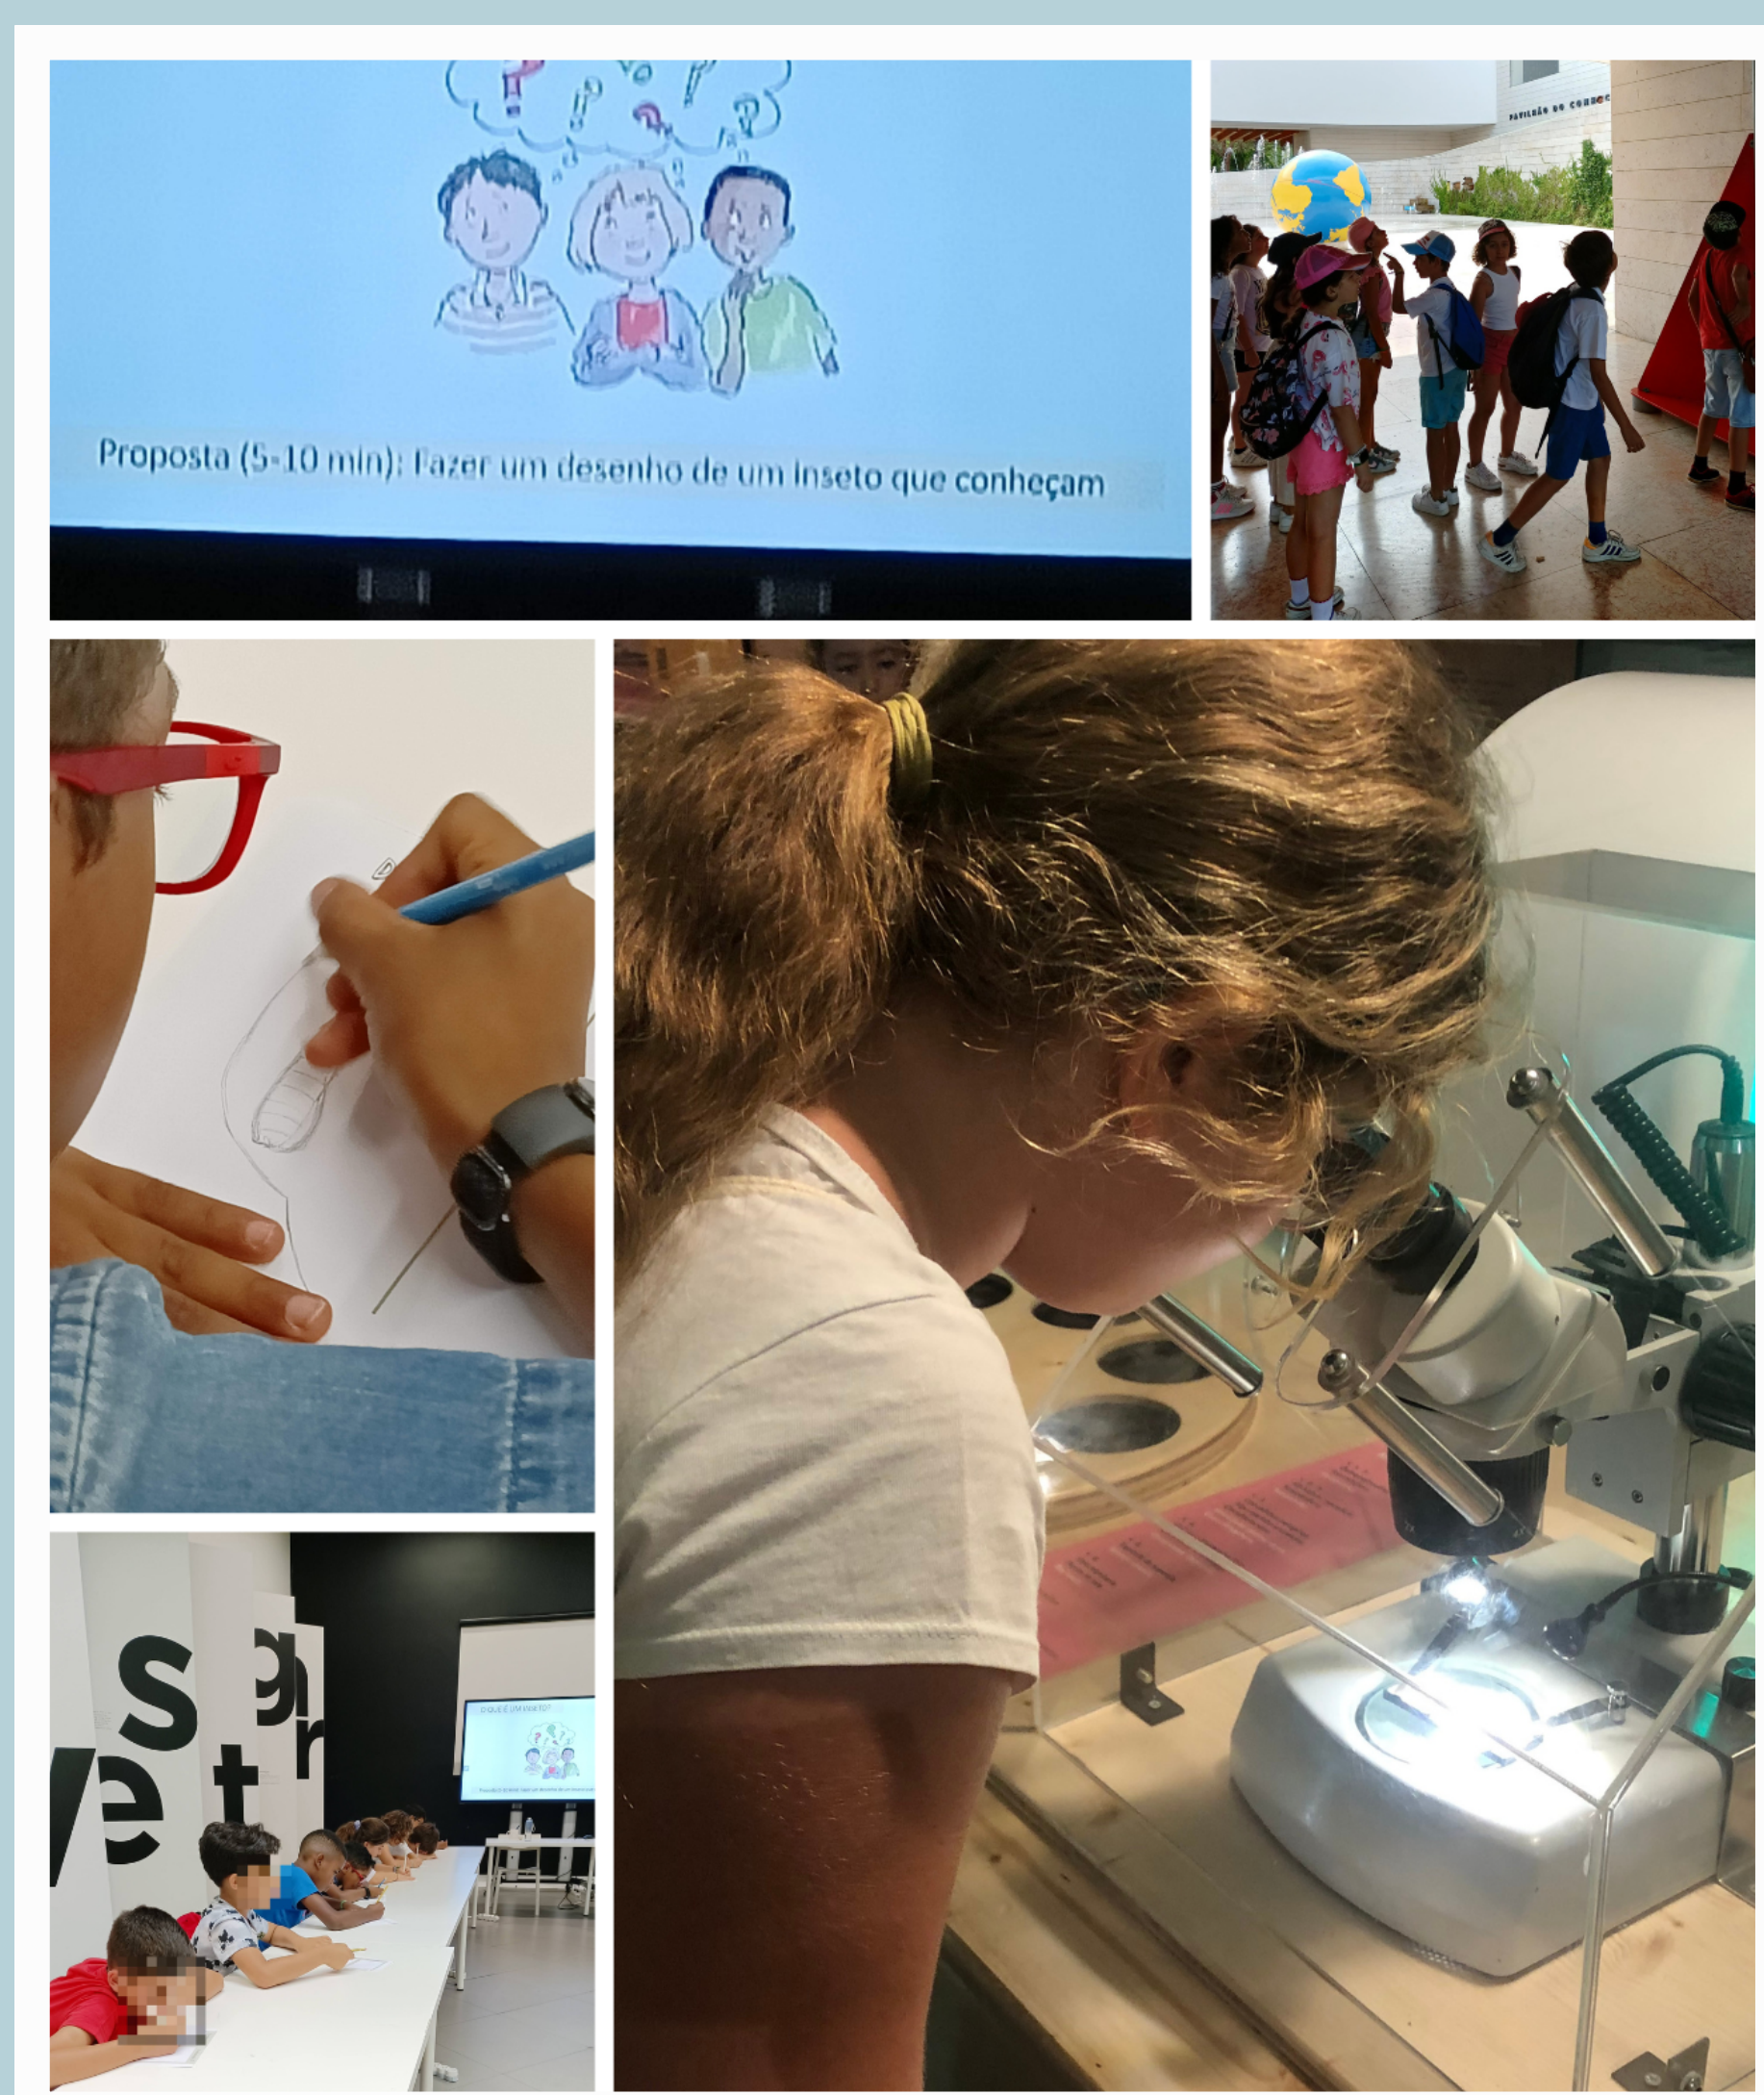

important because it has enriched our knowledge and promoted teamwork.
